

Dear Resident

## COMPUTER SUPPORT ON YOUR DOORSTEP

In 2005, we decided to start-up a computer support business for the local and surrounding area, offering you the highest levels of service, speed and reliability. We ask that you keep the enclosed card next to your computer for those times when assistance is needed. We have hundreds of satisfied computer owners who call upon our friendly team time and time again. Visit our comments page at [www.afterhourssystems.co.uk](http://www.afterhourssystems.co.uk)

After Hours Systems understands how up front pricing, consistent service and flexible hours can work for you. We work when you don't - evenings, weekends and next day and offer guaranteed prices before a job starts. Call now for a price list or a no obligation visit.

We are open 8am – 8pm, 7 days a week including Bank Holidays. Call Jeff or Laura on **07810 812049** before 6pm and we can normally be with you the same day.

You may rely on your helpdesk at work to support you, but at home who do you call to resolve computer crashes, blue screens, viruses, backup plans, software bugs, hardware upgrades, patches, networks, computer setup or secure your wireless broadband connections?

We look forward to hearing from you

Regards

Jeff & Laura Craft

p.s. send an enquiry from our website, quote **2007** and claim a 10% discount (one per household)
